FILMSCREENING
***The DNA of Dignity* by Jan Baumgartner (2022, CH, 61 min)**

The hybrid form between documentary and fiction explores the fate of the mortal remains of thousands of people who disappeared during the Bosnian War in the 1990s.
The survivors and bereaved families place their hopes in archaeological excavations and the work of scientists. They hope to find their loved ones one day, give them a dignified burial, and finally find a place for their grief.

CONVERSATION
Jan Baumgartner (film director)
Dragana Vučetić (forensic anthropologist, featuring in the movie)
Anna Hodel (Osteuropa-Studien) & **Lorenza Mondada** (Linguistik)
